Summary

Full-Stack Developer with experience as a subject matter expert, functional lead, and project manager in multiple full software development lifecycle implementations leveraging his background and skills to develop a more end-user friendly and intuitive internet experience. Currently enrolled in a Southern Methodist University certificate program in full MERN stack web development focusing on responsive web design utilizing HTML, CSS, and JavaScript with an anticipated completion date of December 2020. Covered technologies included jQuery, JSON, APIs, Express, Node.js, and React.js. Certified as a Lean Six Sigma Yellow Belt. A professional with a proven track record of on-time project deliveries, and a passion for developing intuitive web-based tools. Every project I engage in, my goal is to create a simple and complete solution for the end-user. Recently, I worked in a four-person team to design and deploy an interactive application to help travelers find top-rated restaurants and breweries in any city in North Texas based on their cuisine preferences. I am excited to use my skills and experience to develop high quality web solutions.
